

## Music Exploratory Final Project: Create a Poster for The Talent Show

For this project, you will **create a poster for the school’s Talent Show.**

- **Work alone.**
- **Create an original design for a 11 x 17” hand-drawn colour poster for the school’s Talent Show.**
- **Present your poster for others to see** by posting it to the wall (i.e you do not need to speak about your poster.)

### Evaluation

|                                   | <b>Emerging</b>   | <b>Developing</b>   | <b>Proficient</b>   | <b>Extending</b>   |
|-----------------------------------|---|---|---|--|
| <b>Productivity Skills</b>        | You did not use the time productively for this project. You needed to make decisions and solve problems faster, and to persist more diligently with creating the poster. You needed a lot of reminders and direction. | You may have faced challenges with making decisions, problem solving, and using the time productively. You were sometimes or mostly productive, but the poster lacked some detail and/or creativity.  | You started working right away. You worked productively during every class, made decisions, and solved problems as they arose. Your poster was completed on time.   | You managed the class time exceptionally well. You may have continued to work at home.   |
| <b>Most Important Information</b> | The poster did not contain the most important information.  | The poster was either missing a little bit of important information, or there were errors in the information (i.e. words misspelled).   | The poster included: <ul style="list-style-type: none"> <li>• Rockheights Talent Show</li> <li>• 7pm, Friday, April 11<sup>th</sup>, 2025</li> <li>• Rockheights Middle School</li> <li>• Tickets: \$2 per person or \$5 per family</li> <li>• Rockheights Middle School proudly presents a showcase of student talents!</li> </ul>                   | The poster included all of the most important information.   |
| <b>Design</b>                     | Your design does not make effective use of the space. The lettering and placement of objects are not balanced in the space.   | Your design is hand-drawn and original. You considered lettering and the placement of objects, but there may be some issues with balance in the composition (i..e. wasted space, lopsidedness, or some information is presented to large or too small).             | Your design is original and hand-drawn. You have made effective use of the 11x17” piece of paper – you have clearly thought about the placement of text and objects and created an effective composition (i.e. it’s easy to read and there is no unintentional wasted space). You have created lettering and images that are beautiful and effective. | Your design is exceptionally creative and original.  |
| <b>Colour and Execution</b>       | Your design does not include colour, or does not use colour effectively.  | Your design is in colour, but may be lacking attention to details. For example, there may be crooked lines, or colouring that is out of place, or other messiness. Or, you may not have chosen colours effectively (for example if it’s too dark to read the text). | Your design uses colour effectively. You have chosen a colour palette that is effective. All of the information is clearly legible, thanks to the colours you chose. The colouring is effortful and tidy.   | Your choice of colours, and execution of the colouring, is exceptionally beautiful and creative. You may have chosen surprising media to complete your design. |
